ASPR’s Technical Resources, Assistance Center, and Information Exchange (TRACIE) is holding its first webinar of 2018 on pediatric issues during disasters. Children represent close to a quarter of the total U.S. population and are particularly vulnerable during a disaster. Their unique needs and characteristics make it important to identify and incorporate special considerations into preparedness, mitigation, response, recovery, and resilience-building plans and actions.

Join this webinar where pediatric professionals at the federal, state, regional, and local levels will share tangible examples and best practices of how to integrate pediatric issues in healthcare preparedness plans, trainings, and exercises. The lessons learned and examples provided during this webinar can be easily implementable in facilities and jurisdictions across the country.

The webinar will take place **Tuesday, February 13 from 1:00-2:30 PM ET.**

**PARTICIPANTS**

- **Meghan Treber, MS**, ASPR TRACIE (Moderator)
- **Diane Pilkey, RN, MPH**, Senior Nurse Consultant, U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau, Emergency Medical Services for Children and Injury Prevention Branch

**REGISTRATION**

**REGISTER HERE** for this free webinar. The webinar will also be recorded and archived on the ASPR TRACIE website within 1 business day. Each registrant will receive a unique link that will be needed to access the webinar. The link can only be used on one computer; therefore, registrants should not forward their registration confirmation emails to others. Please note that this webinar will be limited to the first 1,000 registrants, so register early. Where possible, only register one time per office or organization and view the webinar together to allow the maximum number of participants.

**Audio:** You can use your computer microphone and speakers (VoIP) or telephone. A phone number and PIN will be provided after you log in to the webinar.
