

Webinar
October 18, 2017 ~ 2:00 – 3:00 pm ET

ASPR's Technical Resources, Assistance Center, and Information Exchange ([TRACIE](#)), in collaboration with the [ASPR Division of Recovery](#), is hosting this webinar with multiple Louisiana health and social service agencies to highlight recovery lessons learned from the 2016 floods to help those currently affected by hurricane and flooding events.

During response and recovery operations, local and state officials and community partners often have questions regarding how to navigate the different federal recovery programs, what challenges should be anticipated during recovery efforts, and what tips are available from other communities to help determine vulnerabilities and areas of focus for maximizing the recovery timeline.

Join this webinar to hear how Louisiana health and human services representatives: managed their recovery; organized, designed, and implemented recovery programs to be compliant with requirements; and delivered the best possible services to their communities. They will also discuss their lessons learned and how their experiences may help their counterparts and other leaders supporting disaster recovery in communities recovering from recent disasters.

The webinar will take place **Wednesday, October 18, 2017 from 2:00-3:00 PM ET.**

PARTICIPANTS

- **John Hick**, MD, HHS ASPR and Hennepin County Medical Center (moderator)
- **Joshua Barnes**, HHS ASPR Health and Social Services Recovery Support Function National Coordinator
